Title: Validation Summary Report for Walk-in Refrigeration / Cold Room Model A820

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

### 1.0 INTRODUCTION

The Validation Summary Report summarizes the qualification activities measured on the Walk-In Cold Room, Polar Leasing Unit 823-2537 and manufacturer serial number of A230612537. The unit is manufactured by Polar King International, Inc. and has a model number of A820. It is controlled by a Friedrich KES12A33A-C cooling unit. This summary also covers any discrepancies encountered throughout the validation study.

### 2.0 REFERENCES

Temperature mapping of storage area, technical supplement to WHO Technical Report Series, No. 961, 2011.

### 3.0 SUMMARY

#### 3.1 INSTALLATION & QUALIFICATION

The validation study for A230612537 was completed on July 13th, 2023. Verification's for the study were documented and saved using Vaisala ViewLinc.

##### 3.1.1 System Components Identification

Identification information for the Cold Room was verified. This included model and serial numbers for the cooling unit and structure.

##### 3.1.2 Documentation Verification

Documentation for installation and maintenance of A230612537 was obtained. These documents were reviewed, and include manuals, quality control reports and production worksheets.

##### 3.1.3 Refrigeration System Components Visual Inspection

A visual inspection of refrigeration system components was conducted to verify the equipment was installed in accordance with the manufacturer's recommendation. Critical components were confirmed to be in new working order. No damage was noted.

##### 3.1.4 Electrical Supply Verification

A Fluke Multi-meter was used to confirm the provided voltage supply was in accordance with requirements specified on the serial plate of the Cold Room.

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

### 3.1.5 Thermostatic Controller Identification

The thermostatic control for this room is integrated within the cooling unit.

### 3.1.6 Refrigeration System Spare Parts

No spare parts are required for the Validation Summary.

## 3.2 OPERATION QUALIFICATIONS

### 3.2.1 Vaisala Validation Equipment Calibration Verification

Calibration documentation for (14) Vaisala RFL100 were reviewed and all temperature data loggers were found to be in calibration.

### 3.2.2 Temperature Data Logger Placement

The set-up of all temperature monitoring loggers was done in accordance with acceptable usage practices, obtaining measurements at multiple low, medium and high points within the Cold Room. A total of 13 internal air data points were logged in each study, as shown in figure 1. Logger #14 was used to record ambient temperatures.

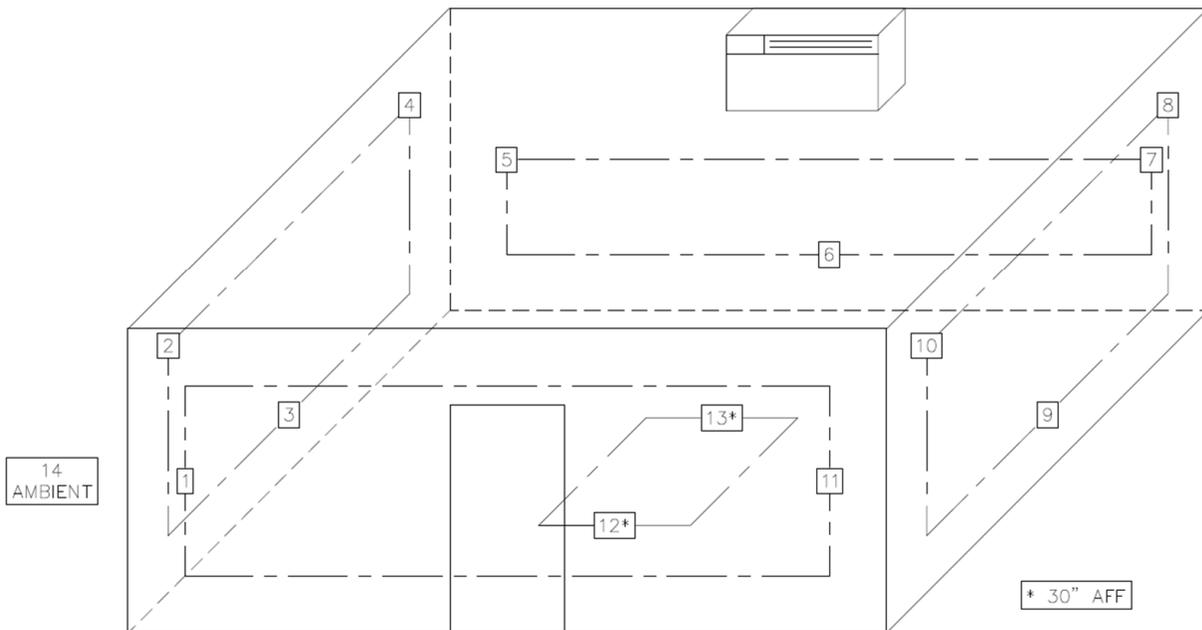

Figure 1

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

**Table 1: Temperature Data Logger Locations and Labels**

Data Logger Location	Data Logger Label	Alternate Data Logger Label
1	Probe #1	1171
2	Probe #10	1277
3	Probe #11	1279
4	Probe #12	1281
5	Probe #13	1283
6	Probe #2	1174
7	Probe #3	1176
8	Probe #4	1178
9	Probe #5	1180
10	Probe #6	1271
11	Probe #7	1273
12	Probe #8	1269
13	Probe #9	1275
14	Probe #14	1285

**3.2.3 24-HR Thermal Mapping (65°F/18°C Set Point)**

At a set point of 18°C (65°F) the Cold Room was monitored for one 24-hour cycle. The door remained closed and locked through the entirety of the test.

Average ambient temperature during the test period was 25.27°C (77.48°F), with a minimum of 15.70°C (60.26°F) and maximum of 37.40°C (99.32°F). Temperature data loggers were positioned as shown in figure 1. Temperature data was recorded from 07:00am EDT on 07/12/23 to 07:00am EDT on 07/13/23. The data was logged at 1-minute intervals. The summarized data for all 13 internal temperature data loggers can be found in Table 2. No deviations from the acceptable range were recorded.

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

**Table 2: Temperature Data Logger Locations and Labels**

Data Logger Location	Data Logger Label	Data Logger Label (Alternate)	Avg. Temp (°C)	Min Temp (°C)	Max Temp (°C)
1	Probe #1	1171	18.29	17.90	18.65
2	Probe #10	1277	18.37	18.10	18.60
3	Probe #11	1279	18.46	18.15	18.75
4	Probe #12	1281	18.07	17.30	18.65
5	Probe #13	1283	18.34	18.00	18.75
6	Probe #2	1174	18.15	17.65	18.50
7	Probe #3	1176	18.26	17.85	18.60
8	Probe #4	1178	18.30	17.95	18.55
9	Probe #5	1180	18.51	18.20	18.85
10	Probe #6	1271	18.22	17.75	18.55
11	Probe #7	1273	18.22	17.75	18.55
12	Probe #8	1269	18.19	17.75	18.55
13	Probe #9	1275	18.38	18.10	18.65

**3.2.4 Open Door Temperature Recovery (65°F/18°C Set Point)**

At an average ambient temperature of 31.55°C (88.79°F) testing was conducted between 03:36pm EDT and 04:14pm EDT on 07/13/23. The door, with strip curtains, was open for 25 minutes with only 5 of the 13 probes recording temperatures above the high limit of 21°C (69.8°F). Testing protocol calls for at least 50% of the probes to exceed the high limit before closing the door, but the test was terminated after 25 minutes, as door openings of this length are well outside of the scope of use. During this period the warmest recorded temperature was 22.10°C (71.78°F).

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

### 3.2.5 Empty Unit Power Failure Test (65°F/18°C Set Point)

Power was terminated from 07:40am EDT to 02:40pm EDT on 07/13/23. Temperature was logged at 1-minute intervals and collected throughout the recovery period until 03:00pm EST.

With power off, internal air temperatures remained at or below 21°C (69.8°F) for a period of 6 hours and 47 minutes. Average ambient temperature for the entirety of the power off event and recovery was 23.28°C (73.90°F), with a maximum of 26.75°C (80.15°F).

The graphical report is appended.

### 3.3 Qualification Deviations

No deviations were found during testing.

### 4.0 CONCLUSION

Temperature validation of A230612537 was deemed successful as a baseline for continued validation by customer.

### 5.0 Approvals

In review of the collected data for this Validation Summary Report, this study has been deemed successful. Any deviations are listed within the Validation Summary Report and are included as appendices.

# VAISALA

## RFL100 Wireless Data Logger for continuous monitoring systems

Features
<ul style="list-style-type: none"> <li>• Industry-leading measurement precision</li> <li>• Interchangeable high-accuracy probes for T, RH, and CO<sub>2</sub></li> <li>• 30-day memory buffer</li> <li>• Typical battery life of 18 months in RH and T measurement</li> <li>• Uses standard alkaline batteries</li> <li>• Probe calibrations are traceable to SI units through national metrology institutes or accredited calibration laboratories</li> <li>• Cost-effective alternative to chart recorders</li> </ul>

RFL100 Data Logger uses Vaisala’s proprietary VaiNet wireless technology. It can be used to monitor temperature (T), relative humidity (RH), and carbon dioxide level (CO<sub>2</sub>) in a wide range of environments. Suitable applications include warehouses, production areas, cleanrooms, laboratories, incubators, fridges, cold storage areas, and freezers down to -196 °C (approx. -320 °F).

### VaiNet wireless

RFL100 connects wirelessly to Vaisala viewLinc Monitoring System, which provides real-time trends, alarms, and historical reporting. VaiNet wireless technology is based on the LoRa<sup>®</sup> modulation technique to provide a robust wireless signal that is extremely reliable over long distances and in complex, obstructed conditions. This wireless technology allows the data logger’s signal to travel over 100 m (approx. 330 ft) indoors without the aid of signal amplifiers or repeaters. Wireless communications are encrypted to ensure data integrity and security.

Measurements are updated and stored every 60 seconds, and sent from the data logger every 4 minutes. In case of temporary network disruptions, the data logger can record up to 30 days of measurements that are automatically transmitted to the viewLinc Enterprise Server software when communications are restored. Recorded data can also be downloaded directly from RFL100 through the USB port.

### Versatility and convenience

RFL100 requires no startup configuration, and the included mounting bracket supports several installation methods. Detailed custom display shows the latest measurement results, alarm and battery status, and signal strength of the current access point connection. The housing is classified IP54 to protect the device from dust and cleaning.

RFL100 is powered by two standard AA size 1.5V batteries (LR6 alkaline or FR6 lithium) for 18 months of operation at approximately 20 °C (68 °F) in RH and T measurement. When fresh batteries are inserted during yearly calibration, battery replacement between calibrations is not needed. External power is required for CO<sub>2</sub> measurement, with the batteries serving as backup in case the external power becomes unavailable.

### Interchangeable probes

The probes are detachable and easy to switch out for calibration. viewLinc Enterprise Server detects the changed probe information automatically and maintains accurate and complete historical records.

RH and T probes use Vaisala HUMICAP<sup>®</sup> humidity sensors and platinum temperature sensors (Pt100 and Pt1000 type) for superior stability. Probes can be integrated with the RFL100 housing or connected using a cable.

CO<sub>2</sub> measurement is provided by the GMP251 probe that uses Vaisala’s patented, latest-generation CARBOCAP<sup>®</sup> technology with exceptional stability. The probe automatically compensates the CO<sub>2</sub> measurement according to ambient temperature.

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

## Probe options

Probe	Description <sup>1)</sup>	Installation notes
<p>HMP110 and HMP110T</p> 	<p><b>Humidity and temperature</b> probe for measurement in demanding conditions. Robust stainless steel construction. Temperature-only version HMP110T available.</p> <p>Plastic grid filter provides the fastest responsetime. For added protection, select the membranefilter, the PTFEfilter, or the stainless steel sintered filter.</p> <p>Measurement temperature range -40 ...+80 °C (-40 ...+176°F).</p>	<p>Suitable for measurement inside chambers, incubators, fridges, and freezers.</p> <p>Versatile mounting options using accessories.</p> <p>Must be connected to RFL100 using a cable.</p>
<p>HMP115 and HMP115T</p> 	<p><b>Humidity and temperature</b> probe for general purpose measurement. Temperature-only version HMP115T available.</p> <p>Plastic grid filter provides the fastest responsetime. For added protection, select the membranefilter or the PTFEfilter.</p> <p>Measurement temperature range -40 ...+60 °C (-40 ...+140°F).</p>	<p>Ideal choice for ambient measurement.</p> <p>Can be integrated with the RFL100 housing or connected using a cable.</p>
<p>TMP115</p> 	<p><b>Temperature</b> probe for measurement in a wide range of conditions.</p> <p>Available as 50 cm (1ft 7.7in) and 3m (9.8 ft) long versions. Length includes the probe body and sensor tip.</p> <p>Measurement temperature range -196 ...+90 °C (-320 ...+194°F).</p> <p>Operating temperature range of the probe body is -40 ...+60 °C (-40 ...+140°F).</p>	<p>Suitable for measurement inside chambers, fridges, and freezers.</p> <p>Can be integrated with the RFL100 housing or connected using a cable.</p> <p>Sensortip withstands immersion in glycol and liquid nitrogen.</p> <p>Use the thermal dampener block accessory (item code 236310SP) to add thermal mass to the sensor tip.</p>
<p>GMP251</p> 	<p><b>Carbon dioxide</b> probe for %-level measurements. Designed for use in demanding applications such as life science incubators.</p> <p>Measurement temperature range -40 ...+60 °C (-40 ...+140°F).</p> <p>When ordered with the RFL100 data logger, the probe is delivered with a mounting kit that includes a probe holder designed for use with GMP251 and the other supported probes. The kit also includes a magnetic holder for the Probe Splitter M8/M12 accessory.</p>	<p>Must be connected using the Probe Splitter M8/M12 accessory. Any one of the other supported probes can be connected at the same time in the M8 connector of the probe splitter.</p> <p>Requires use of external power supply due to power consumption. Data logger batteries provide a backup in case the external power is not available.</p> <p>Logged temperature data is limited to range -40 ...+60 °C (-40 ...+140°F) when GMP251 is connected.</p>

1) See probe datasheets for detailed probe specifications.

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

## Accessories

### Accessories

Accessory <sup>1)</sup>	Item code
Probe cable for RFL100, 1.5m	CBL210555-1M5SP
Probe cable for RFL100, 3 m	CBL210555-3MSP
Probe cable for RFL100, 10 m	CBL210555-10MSP
Flat cable for RFL100, 3 m	CBL210647SP
Probe holder (5 pcs) for Ø 12mm probes	ASM213382SP
CO <sub>2</sub> probe mounting kit	ASM214253SP
Probe splitter M8 (for connecting two T probes)	CBL210834SP
Probe splitter M8/M12(for connecting a CO <sub>2</sub> probe)	CBL211050SP
1m high-temperature cable M12(for CO <sub>2</sub> probe) <sup>2)</sup>	271038SP
1m high-temperature cable M8(for RH/T probe in CO <sub>2</sub> applications) <sup>2)</sup>	271039SP
Universal power supply (100–240 V AC/ 5 V DC)with micro-USB connector	ASM214178SP

1) See probe datasheets for probe-specific accessories.

2) High-temperature cables are extensions for the probe splitter M8/M12 in CO<sub>2</sub> applications. They tolerate -20 ... +180 °C (-4 ... +356 °F) temperatures and can remain inside an incubator during a typical heat sterilization cycle. Due to heat conduction, leave half of the cable in ambient temperature when installed.

RFL100 with two TMP115 probes (left) and with GMP251 and HMP110 probes (right)

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

## Technical data

### Wireless

Networking standards	Vaisala VaiNet
Modulation	LoRa™ chirp spread spectrum modulation
Output power	13dBm (20 mW)
Antenna	Internal
Typical range (indoors)	At least 100 m (approx. 330 ft)
Range with line-of-sight	Over 500 m (1640ft)
Frequency bands	868 MHz, 915MHz, 920 MHz, and 922 MHz

### Memory

Sample capacity	30 days (43200 samples per channel)
Memory type	Non-volatile EEPROM
Memory mode	Ring buffer (FIFO)
Sampling rate	One sample / channel / minute (non-changeable)

### General

Compatible probes	GMP251, HMP110, HMP110T, HMP115, HMP115T, TMP115
Batteries	2 × AA sized, 1.5V (LR6 or FR6)
<b>Operation time on battery power at 20 °C (68 °F)</b>	
RH and T measurement in any probe combination	18 months
CO <sub>2</sub> measurement	Typically 12 hours with lithium batteries

### Compatibility requirements

Item	Required minimum version(s)
viewLinc version	viewLinc Enterprise Server 5.0
Dual T probe support using Probe Splitter M8 accessory	<ul style="list-style-type: none"> <li>RFL100 firmware 1.2.0</li> <li>AP10 firmware 3.0</li> <li>viewLinc Enterprise Server 5.0.2</li> </ul>
CO <sub>2</sub> measurement using Probe Splitter M8/M12 accessory and external power	<ul style="list-style-type: none"> <li>RFL100 firmware 1.4.0</li> <li>RFL100 hardware manufactured after July 2021</li> <li>AP10 firmware 4.0 and hardware revision G</li> <li>viewLinc Enterprise Server 5.1</li> </ul>

### Operating environment

Storage temperature	-40 ... +60 °C (-40 ... +140 °F)
Operating humidity	0 ... 100 %RH, non-condensing
IP rating	IP54
IP rating with external power supply	IP20
<b>Operating temperature <sup>1)</sup></b>	
with alkaline batteries	+2 ... +60 °C (+35.6 ... +140 °F)
with lithium batteries	-20 ... +60 °C (-4 ... +140 °F)
with external power supply	0 ... +60 °C (+32 ... +140 °F)

1) Verify operating temperature specification when using third party batteries and power supplies.

### Compliance

EMC compatibility	IEC/EN 61326-1, industrial environment
Electrical safety	IEC/EN 61010-1
<b>868 MHz model</b>	
EU directives and regulations	RoHS Directive (2011/65/EU) amended by 2015/863 Radio Equipment Directive, RED (2014/53/EU)
Radio standards and approvals	ETSI EN 300 220-2 ETSI EN 301489-1 ICASA No: TA 2020-7761 IMDA No: DB105576 TRA No: 67584/18 Serbia: U005 21
Compliance marks	AAA, CE, UKCA
<b>915 MHz model</b>	
Radio standards and approvals	Anatel ID: 04761-19-12322 AS/NZS 4268 FCC ID: 2A039-RFL100A IC ID: 23830-RFL100A NOM ID: 1901C00493
Compliance marks	ANATEL, China RoHS, NOM, NYCE, RCM
<b>920 MHz model</b>	
Radio standards and approvals	MIC ID: 012-200007
Compliance marks	GITEKI
<b>922 MHz model</b>	
Radio standards and approvals	NCC ID: CCAP21LP1240T3
Compliance marks	NCC

Manufacturer:	Polar King International, Inc.
Model Number:	A820
Equipment ID / Serial No:	A230612537

### Mechanical specifications

Housing color	White
Mounting methods	Screws, cable ties, hook, or magnetic mounting bracket (optional accessory)

Probe interface	4-pin female M8 connector
Service port	USB2.0 with micro-USB connector

**Dimensions (H × W × D) with HMP115probe**

Without mounting bracket	158 × 62 × 31mm (6.22 × 2.4 × 1.22in)
With mounting bracket	186 × 68 × 36.5 mm (7.32 × 2.68 × 1.44in)

**Weight**

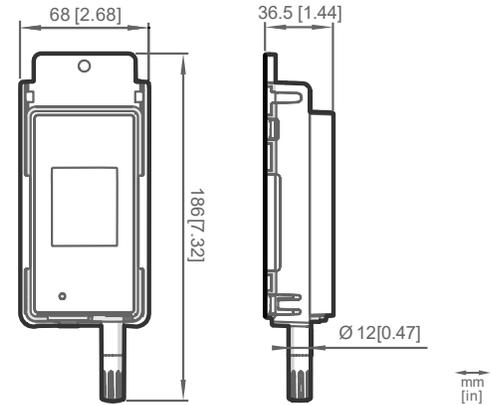

With batteries (2 pcs alkaline) and HMP115probe	190g (6.7 oz)
With batteries (2 pcs alkaline), HMP115 probe, and magnetic mounting bracket	254 g (8.96 oz)

**Materials**

Housing	PC/ABSblend
Display window	PMMA(acrylic)
Sealings	TPE

### Requirements for external power supply

Output voltage	5 V DC
Output power	Min. 1W
Output connector	Micro-USB
Certifications and approvals	<ul style="list-style-type: none"> <li>• Certified to IEC62368-1</li> <li>• Approved for use in your country</li> </ul>
